

This procedure is for the dealer installed Honda keyless entry system. The remote for this system has four buttons one of them being a small round option button.

1. Insert key and turn the ignition to ON (The position just before starting the car)
2. Locate press and HOLD valet disarm button do not release until step 4(see image above button in red) you must have a factory radio for this procedure to work. The door locks will cycle to confirm programming mode.
3. Press the LOCK button on the remote being programmed. The door locks will cycle to confirm the remote has been successfully programmed. Repeat this step for any additional remotes you wish to program otherwise proceed to step 4.
4. RELEASE the valet disarm button. Programming complete.
