

This procedure is for the FACTORY INSTALLED keyless entry system

1. Start with the key REMOVED from the ignition.
2. Locate and disconnect the mirror adjustment switch located on the driver's side door.
3. Using a jumper wire jump pin 2 to pin 10 on mirror adjustment harness itself and leave them jumped. The door locks will cycle to confirm the vehicle has successfully entered programming mode.
4. Press the LOCK button on the first remote being programmed(does not matter which remote). The doors locks will cycle to confirm successful programming of the remote.
5. If you have additional remotes to program repeat step 4. If you have no further remotes to program proceed to step 6.
6. Remove the jumper wire from step 3 and reconnect the mirror adjustment switch. Programming is now complete.
